

TSN00728-300-A | Air Chuck, JACO to Shrader

Purpose:

This tool works in conjunction with the Milwaukee M12 or M18 Battery powered tire inflator. Use of this tool with the Milwaukee Inflator, will prolong the life of the Milwaukee tire inflator hose, and allow quick, locking, attachment to the vehicle's tire air valve. The JACO locking air chuck has the proper clearance for installing to Rivian 20" wheels without scratching.

Labor Codes:

- 2200991122 Wheel & Tire General Diagnostic, No Trouble Found
- 224084013 Check Tire Pressure, CA Mandate

General Principles:

The air chuck threads onto the hose end-fitting and can be left permanently as a component of the air inflator. The Locking chuck installs to the tire air valve for quick installation and removal when filling a tire with air

Tool can be used with:

- Milwaukee M12 Tire Inflator | Mfr. P/N 2475-20
- Milwaukee M18 Tire Inflator | Mfr. P/N 2848-20

Tool Operation:

Thread the chuck onto the end-fitting of the Milwaukee Tire Inflator and leave it installed.

This tool replaces the old version which does not fit 20" wheels properly.
