

TSN00786 | EDV BUMP STOP WRENCH

Purpose:

This wrench can be used to loosen, tighten, or torque EDV rear suspension bump stops, without the removal of other suspension parts.

Labor Codes:

183272010 Bump-stop, Rear Suspension, LH (Remove and Replace)

183272110 Bump-stop, Rear Suspension, RH (Remove and Replace)

General Principles:

Follow proper, safe vehicle lifting practices. Refer to Service Manual Raise and Support procedures.

Tool can be used with:

- ½" Drive Ratchet.
- ½" Drive Breaker Bar.
- ½" Drive Torque Wrench (Refer to Service Manual for specified torque value).

Tool Operation:

Lift vehicle to decompress suspension then place wrench on bump-stop integrated nut.

Turn wrench either by its own handle, or attach a ½" drive ratchet, or breaker bar to loosen the bump-stop.

Attached a ½" torque wrench to the bump-stop wrench to torque the bump-stop. Refer to Service Manual for torque specification.
