

# TSN00954-300-A CASTER TORQUE ADAPTER, REACH-OVER, GEN 1

## Purpose

To torque the front caster bolts on GEN 1 Subframe R1 vehicles

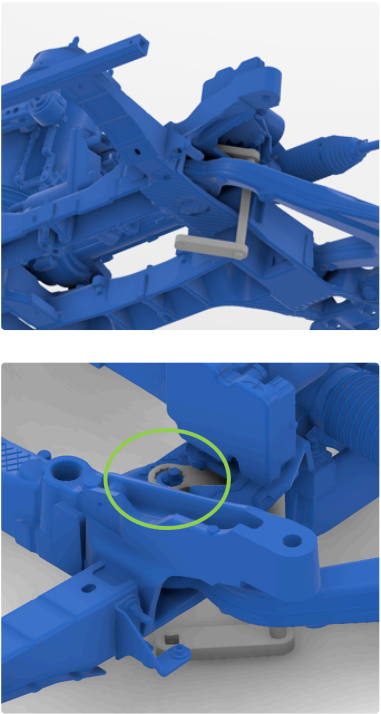

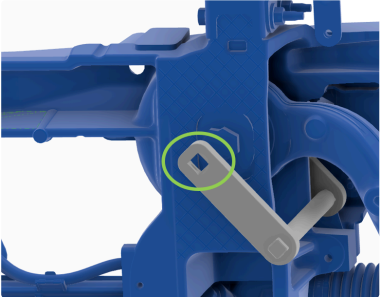

## Reference

Labor Code: 981010019 - Alignment, Four Wheel, Check and Adjust

## Tool Usage

STEP		
1	Follow the service manual process up to adjusting front caster.	
2	Fit the tool into the area as shown; Inside the lower control arm area and over the subframe to the caster nut.	LH SIDE SHOWN

		
3	Attach a torque wrench to the tool.	
4	Torque the caster nut to spec. (The angle of the tool in relation to the torque wrench is not important)
